Weekly Meetings [Tentative]

Location: Samuel C.
Williams Library

Time: Wednesday 4 - 5 pm

Communication: WhatsApp
and Google Hangout
(remote group meeting)

Project Space

Codebase (GitHub)

<https://github.com/raymondyin/sit-sw690-group-work>

Documents (Google Drive)

<https://docs.google.com/presentation/d/1ESQrat6D1Q6h7nSshjo6C7ojz8Mq-LQcXwBDsR-fu0/edit?usp=sharing>

Project Management (Trello)

<https://trello.com/sitssw690project>

Team Decision-Making Process

1. An idea or an issue is informed to the whole team and discussed
2. informal leader makes a tentative call based on his/her judgement
3. the rest of each team member make a vote, decision is made when the vote is over 50%
4. decisions can be revisited if one member strongly oppose it

The Problem

We are all pretty isolated.

- New students have limited means to connect to alumni for their career.
- Little physical exposure at campus meaning you lose chances to meet people.
- No everyone can be found on Facebook, and no particular place to discuss things within Stevens.

— — —

Customer Groups

Direct customers

- college/college administrators
- advertisement venders

Indirect customers

- Stevens students
- Stevens alumni
- (optional) faculties

Introducing QuAck

Social Platform

The problem solver

- Customizable to each college
- Focusing on socialization within school network
- Helps bonding together the isolated individuals associated with the school

— — —

The Goals

Our software project...

- connects students and alumni in meaningful ways for both of their careers
- provides online space for socializing and general communications
- improves university lives of students by helping them form and diversify social circles

— — —

Proposed Features

Cross-Platform

(features)

- Android and iOS device supported
- Web browsers supported (tentatively, Chrome, Safari, and Edge)

— — —

Marketplace

(features)

- helps students and alumni conveniently trade things like textbook, course enrollment space, furnitures etc.
- helps students finding roommates and/or landlords

— — —

Social Connection

(features)

- users and student life staffs can post events
- suggests connections according to personal information such as interest, major, companies, locations etc., or simply by messaging
- allows Q&A posts and job postings
